

Features :

- 60 amps rated load
- Ceramic brazing technology is used to prevent arcing leakage, fire and explosion
- No polarity requirement for contacts and coil
- RoHS compliant

Typical applications:

- Commercial vehicle pre-charging relay
- Heating relay

24	≤18	≥2.0	32	110.8	5.2	5.2

1) Max.allowable voltage refers to the maximum value in a varying range of operating power voltage, not a continuous voltage;

2) Unless specified otherwise, ambient temperature:23°C, on:off /0.6s: 5.4s;

3) If other types of rated coil voltage is needed, please contact us.

Other Data

Ambient temperature	-40°C to +85°C
Ambient humidity	5% to 85% RH
Vibration resistance (functional)	10 to 500Hz, 49m/s ² (5G)
Shock resistance ¹⁾	
Functional	Closed state: 196m/s ² (20G)
	Disconnected state: 98m/s ² (10G)
Destructive	490m/s ² (50G)
Terminal type	Connector (coil) and screw (load)
Weight	Approx. 156g
External dimension	64×33×52.8
Packaging unit	54pcs

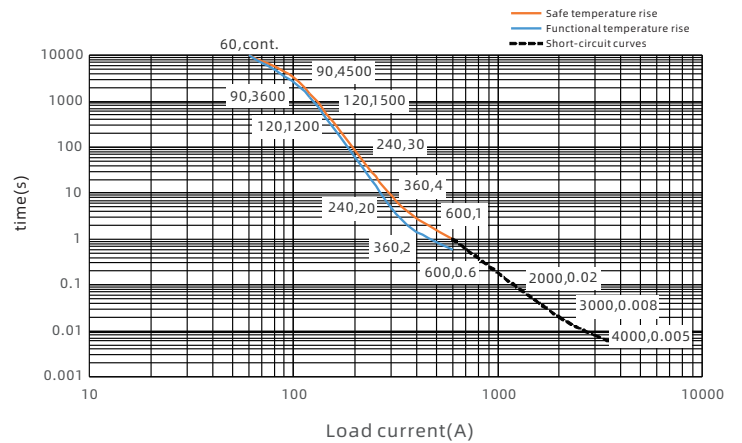

1) No change in the switching state >10us.

Coil operating range

1) Coil supplied voltage 12VDC;

Tolerance curve

- 1) The upper limit of safety temperature is 180°C, and the upper limit of functional temperature is 150°C;
- 2) If the product needs to work for a long time, it is recommended that the product temperature should not exceed 150°C. If the safety temperature exceeds 180°C, the relay may be ignited;
- 3) Ambient temperature is 85°C, wire cross sectional area $\geq 15\text{mm}^2$; (Test conditions for this curve)
- 4) Relay load current over 600A is short circuit resistance performance. The relay can guarantee no fire or explosion within this curve. When the current is greater than 1500A, the relay contact may be repulsed by a large current.

Outline Dimensions

- 1) Maximum allowable torque as shown in the figure. One-time mounting only, no recurring screw fastening permitted;
- 2) Mount load connections first.

Notes**● Mounting Precautions**

1. By principle, please do not use it when the relay drops on the ground.
2. It's forbidden to use the product at the temperature beyond $-40^{\circ}\text{C} \sim 85^{\circ}\text{C}$ for a long time as the relay contacts are sealed and filled with gas and when the contact temperature changes, the gas will break the ceramic sealed chamber.
3. When installing the relay, always use washers to prevent the screws from loosening.
4. Tighten each screw with given torque as suggested. Exceeding the maximum torque may result in screw loose, breakage, etc. When using screws, please make sure the washers are strong enough to prevent the case from deformation.
5. Avoid mounting the relay near strong magnetic fields or a heat generator.

● Precautions for connection of the load terminals

1. Please avoid excessive load applied to the product. If the product exceeds the rated range, the performance of the product cannot be guaranteed.
2. Please treat the relay as a product with limited life and replace it when necessary.
3. Be careful that foreign particles or oil attach on the terminals will lead to abnormal heating on terminals. And below connectors or conductors with sizes are suggested.

10A	Min. 2mm^2 nominal cross-sectional area
20A	Min. 3mm^2 nominal cross-sectional area
40A	Min. 10mm^2 nominal cross-sectional area
60A	Min. 15mm^2 nominal cross-sectional area
100A	Min. 35mm^2 nominal cross-sectional area
150A	Min. 45mm^2 nominal cross-sectional area
200A	Min. 60mm^2 nominal cross-sectional area
250A	Min. 80mm^2 nominal cross-sectional area
300A	Min. 100mm^2 nominal cross-sectional area
400A	Min. 200mm^2 nominal cross-sectional area

● Precautions for connection of the coil

1. Please note that when using a diode, the release time will increase and the switching capacity may decrease. We recommend installing a surge protector varistor.
2. The pick-up voltage and drop-out voltage will change with ambient temperature, please use rated voltage to make sure the relay operate reliably. Don't exceed maximum coil voltage.
3. Please do not continuously apply maximum voltage on the coil.
4. Products with economizer, are recommend to use increase rapidly (phase step power supply mode) to drive the coil.
5. Products with economizer, the coil current will automatically switch after 0.1s. Please do not repeat switch the coil voltage at $< 0.1\text{s}$, otherwise the Product performance can be not guarantee.
